EDUCATION

2021: B.Tech. (Metallurgical & Materials Engineering) from National Institute of Technology (NITK), Surathkal, Karnataka

2016: Intermediate (Science Stream) from DA V Centenary Sr. Sec. School, Ajmer CBSE

2013: High School (All Subjects) from East Point Sr. Sec. School, Ajmer RBSE

CORE COMPETENCIES

- Credit Risk Analytics
- Portfolio Strategy & Optimization
- Risk Segmentation
- Acquisition Strategy Development
- SAS Programming (Base, Advanced, Macros, Proc SQL)
- Predictive Analytics
- P&L Analysis & Profitability Analytics
- Delinquency & NCL Management
- Data Automation & Reporting Optimization
- Tableau Data Visualization & Dashboarding

CERTIFICATION

- Data Analytics course by Great Learning

HARDIK YADAV

Lead Assistant Manager

PROFILE SUMMARY

- **Strategic Credit Risk Specialist with nearly 5 years of experience** in designing and optimizing acquisition and portfolio strategies, leveraging advanced analytics to drive risk-adjusted profitability and sustainable growth across global banking portfolios.
- **Data-Driven Decisioning Expert** adept at translating complex datasets into actionable insights using SAS, SQL, and Tableau, enabling enhanced credit policy formulation, improved approval rates, and reduced delinquency exposure.
- **Portfolio Performance & Risk Analytics Leader** with proven expertise in P&L impact assessment (GCL, ANR, EBIT), risk segmentation, and predictive modeling to optimize customer lifecycle value.
- **Automation & Process Transformation Champion** skilled in developing scalable reporting frameworks using SAS Macros, Proc SQL, and UNIX scripting, delivering 40–60% efficiency gains and eliminating manual dependencies.
- **Consultative Stakeholder Partner** experienced in driving end-to-end strategy lifecycle—from hypothesis testing and implementation to performance monitoring—while ensuring alignment with risk appetite, regulatory expectations, and business KPIs.

KEY HIGHLIGHTS

- Drove credit risk analytics and portfolio optimization using predictive models, achieving reduction in delinquency and 3.2% improvement in approval rates.
- Built data-driven acquisition and segmentation strategies using SAS, delivering growth in quality acquisitions and 1.5% drop in early defaults.
- Led profitability and P&L analysis to optimize product performance, driving 0.6% margin improvement.
- Automated reporting and reducing manual effort by 9.8% and improving reporting TAT.

WORK EXPERIENCE

EXL Services

Lead Assistant Manager | Client: Leading US-based Retail Bank

Since May'21

Key Result Areas:

Acquisition Strategy Development

- Designing and optimizing acquisition strategies across retail portfolios by leveraging bureau scores, credit utilization patterns, and profitability segmentation, while aligning with defined risk appetite frameworks.
- Evaluating financial and risk impact of strategies through comprehensive P&L analytics, encompassing GCL, ANR, revenue, sales, delinquency metrics, EBIT, swap-set assessments.
- Developing recession-resilient portfolio strategies and dynamic credit line assignment frameworks using ML-driven model scores to strengthen risk controls under stressed scenarios.
- Driving process efficiency by automating acquisition policy decisioning gaps, reducing manual interventions, improving STP rates (+10%), and mitigating operational risks.
- Generating data-driven insights to enhance targeting precision, reducing NCL rates (-2%) while improving approval rates (+1%) and overall portfolio performance.

TECHNICAL SKILLS

- **Analytics & Programming:** SAS (Base, Advanced), SQL, UNIX Shell Scripting
- **Business Domains:** Retail Banking, Credit Line Strategy, Risk Segmentation
- **Visualization:** Tableau, Excel Dashboards
- **Reporting & Automation:** Proc SQL, SAS Macros, Proc Report

Strategy Testing & Implementation

- Building and maintaining performance tracking dashboards across 6+ portfolios, monitoring volume/value metrics, FICO migrations, incremental sales, delinquency trends.
- Conducting rigorous pre- and post-implementation validations of credit strategies to ensure alignment with business KPIs and risk thresholds.
- Enhancing performance reporting by integrating advanced metrics, including 180-day and Year-1 sales uplift, to provide deeper strategic visibility.

Automation & Reporting Optimization

- Automating 10+ legacy Excel-based reports and optimizing 50+ SAS workflows using SAS Macros, Proc SQL, and shell scripting to drive operational efficiency.
- Eliminating end-user computing dependencies, improving data accuracy, governance, and scalability of reporting frameworks.
- Reducing turnaround time for recurring business reports by 40–60%, enabling faster and more informed decision-making.
